Experiment 5

AIM: Write an HTML page that contains a selection box with a list of 5 countries. When the user selects a country, its capital should be printed next in the list. Add CSS to customize the properties of the font of the capital (color,bold and font size).

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Country Capital Selector</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            text-align: center;
            margin-top: 50px;
        }
        select {
            font-size: 18px;
            padding: 5px;
        }
        #capital {
            color: blue;
            font-size: 20px;
            font-weight: bold;
            margin-top: 20px;
        }
    </style>
</head>
<body>
    <h2>Select a Country to See Its Capital</h2>
    <select id="country" onchange="showCapital()">
```

```html
    <option value="">-- Select a Country --</option>
    <option value="India">India</option>
    <option value="USA">USA</option>
    <option value="France">France</option>
    <option value="Japan">Japan</option>
    <option value="Germany">Germany</option>
</select>
<p id="capital"></p>
<script>
    function showCapital() {
        var country = document.getElementById("country").value;
        var capital = "";

        switch (country) {
            case "India":
                capital = "New Delhi";
                break;
            case "USA":
                capital = "Washington, D.C.";
                break;
            case "France":
                capital = "Paris";
                break;
            case "Japan":
                capital = "Tokyo";
                break;
            case "Germany":
                capital = "Berlin";
                break;
            default:
                capital = "";
        }
        document.getElementById("capital").innerText = capital;
```

```
        }
    </script>
</body>
</html>
```
